**Subject:** Re: CA wildfires

Vince and Erica,

At this point aside from the aerial deposition from ash the fires in and immediately around LA aren't that large, relatively speaking. They also aren't directly up hill or upstream from any of our projects so the landslides that may come from these burn areas shouldn't impact our projects directly.

We had a few mentions of fire regime in our BRP revision process but I and others aren't sure how or if we should tie it in.

There is still the chance for more fires to start and we as well as the rest of LA are keeping a watchful eye.

My best to you both and thanks for your thoughts.

Regards,

Tom

Hi Tom,

I've been following the news on wildfires in your neck of the woods, hoping everyone is doing alright. We're definitely keeping you all there in our thoughts. Please keep us updated – when you can – particularly if it affects the greater NEP study area. Be safe!

Vince
